Dear Professor,

I have attached my thesis report for your review. I would be grateful if you could kindly go through it and provide your valuable feedback or suggestions for improvement.

Additionally, I am currently working on the poster design. Could you please let me know whether I need to submit the poster for the pre-defense as well?

Thank you for your time and guidance. I look forward to your response.

Kind regards,
Pramod Sandaruwan

Dear Pramod,

I'll consider your work and answer you as soon as possible.
The poster isn't necessary for pre-defense? only Presentation on 10 min. and preliminary uploaded report.

Best regards,

Professor, Dr.sc.ing. Alexander Grakovski

Dear Pramod,

Your MSc report is very good together with formatting, size and content, you may upload it.
Now, please, concentrates on the presentation logics and timing (10 min) + think about short 60 sec. video or demo for demonstration of your system workability.

You may send me the presentation before May 25, but later we'll discuss it and make the plan of the work final steps.

Dear Professor,

Thank you very much for your feedback. I will upload the report and now focus on the presentation, timing, and system demo video.

I will send you the presentation before May 23.

Best regards,
Pramod Sandaruwan

Dear Professor,

Please find my presentation attached to this email. I have also attached a short demo video to illustrate the testing experiment.

Best regards,
Pramod

Dear Pramod,

Today you successfully passed the pre-defense. Congratulations!

For improving your presentation (as well as the report) I think that you need to highlight more detailly your main action:

Data fusion UWB + GPS + IMU -> Accurate_XYZ.

For example, Kalman filtering:

$$\text{Accurate_XYZ} = (1 - k_1) * \text{XYZ_uwb} + k_1 * \text{XYZ_gps_imu},$$
$$\text{and } \text{XYZ_gps_imu} = (1 - k_2) * \text{XYZ_gps} + k_2 * \text{XYZ_imu},$$
where Kalman filter coefficients k_1 and k_2 defined by CNN / ML what was trained on real measurements dataset.
etc. i(n this manner).

Best regards,

Professor, Dr.sc.ing. Alexander Grakovski

Dear Professor,

Thank you very much for your valuable feedback and suggestions. I will improve the presentation and report by explaining the data fusion and Kalman filtering process more clearly.

Best regards,
Pramod Sandaruwan

Dear Professor,

I have updated the presentation with additional visualizations to better illustrate the data and to highlight the main actions in greater detail, as suggested for both the presentation and the report (Page 33, Equation 15).

I have attached the updated presentation and report files for your review.

I have also created a GitHub repository for the project and added the repository link to the report. I am currently uploading the remaining project files and improving the README.md file to make it more informative and easier to understand.

GitHub Repository: <https://github.com/pramodsandaruwan/UWB-Localization.git>

Kind regards,
Pramod Sandaruwan

Dear Pramod,

Some remarks:

- Page 34 - "**Where**" replace by "where"
- page 54-55 - Unknown units of vertical axis Fig.13-14, and paragraphs formatting (First line and space after)
- Presentation is OK.

After improvement you may upload it.

Best regards,

Professor, Dr.sc.ing. Alexander Grakovski

Dear Professor,

Thank you for your remarks.

I have made the necessary updates and uploaded the final revised version of the report, including the supplementary materials.

Best regards,
Pramod Sandaruwan
